

# The Future of Ann Street Landfill

## Why We're Here: The Problem

Thousands of city and county residents and businesses rely on the Cumberland County Solid Waste Department and Ann Street Landfill for waste disposal every day. **The landfill, which has operated at this site since 1980, will reach capacity in just seven years.** Before that time, the community will need to plan for waste disposal beyond 2030.

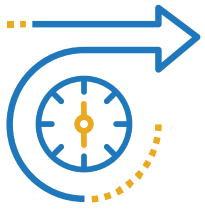

## Where We're Going: The Solution

STAGE 1	STAGE 2	STAGE 3	STAGE 4
<b>Construct a transfer station</b>  Waste will ship long distance via truck to landfills in other communities.  The county's goal is to have this transfer station up and running by mid-summer of 2024.	<b>Expand the current landfill</b>  Will expand onto county property adjoining the Ann Street Landfill to the west. Most of this property is a former unlined landfill.  This will add 20 years of capacity, extending the life of the landfill until 2050.	<b>Use the transfer station during landfill expansion</b>  This will ease the burden on the current landfill while the county permits and constructs the landfill expansion to the west.	<b>Transition to using the expanded landfill as each section is ready</b>  The county will gradually decrease use of the transfer station while increasing use of the expansion area.

# What will expansion mean?

## Long-Term Service

Adds at least an additional 20 years of capacity.

## Environmental Responsibility

Minimal environmental impacts by utilizing the existing space and infrastructure.

Remediation of former unlined site, removing potential environmental impacts.

## Odor Control

Keeping being a good neighbor front of mind. Landfill mining is not anticipated to generate odors off-site.

## Being a Better Neighbor

**Your voice will help us build a better project.** Understanding how our current operations impact neighbors will tell us how we can be more user-friendly, minimize impacts, and enhance our operations to be better neighbors.

## Submit comments until March 17, 2023, by way of:

- The project website at [cumberlandcountync.gov/annstreetplan](http://cumberlandcountync.gov/annstreetplan)
- Send an email to [annstreetlandfill@cumberlandcountync.gov](mailto:annstreetlandfill@cumberlandcountync.gov)
- Call the project hotline at (910) 505-9334
- Send a letter standard mail to 698 Ann Street, Fayetteville, NC 28301
- Complete a comment form at the in-person Public Information Meeting **March 2, 2023**.
